

Fast Comm 9642T LL Setup

Settings for the ORIGINATING/ANSWERING modem when programming:

Up (on) 1 78
Dn (off) 23456 90

Connect to the terminal and issue this command:

For 9600 baud: AT&X2&N6&W
For 4800 baud: AT&X2&N4&W

Then set the switches as indicated below for the ORIGINATING modem:

Up (on) 234 678
Dn (off) 1 5 90

ANSWERING modem:

Up (on) 2 4 78
Dn (off) 1 3 56 90

To force the modems to retrain, press IITDII on the ANSWERING modem.

“ /usr/bin/calendar: syntax error at line N: 'end of file' unexpected" Error: NEW “

If this error is encountered in ROOT'S MAIL, solve it this way:

This problem is typically caused by a corrupted /etc/passed file. To see if this is the case, edit /etc/passed and look for a line with empty fields. This has been seen to be

< bad >:x:::::

which is a bogus line.

- **SAVE** the /etc/passed file before making changes
- **REMOVE** the bogus line in /etc/passed
- **USE** lauthck -avI to fix any problems that might still be there with the authorization databases, or because /etc/passed does not match the authorization databases (IF ANY QUESTIONS ARE ASKED, ANSWER IN THE **AFFIRMATIVE & RE-RUN** lauthck -av')
- **THROW AWAY** the junk mail: mail

Use d[start]-[end] (specifying message numbers) to delete messages
