

CANCELING PRINT JOBS ON AN ETHERNET PRINTER

Type **cd /var/spool/lpd** and enter

Type **mb *** to see which printer has the most data

Type **cd name-of-printer**

Type **pwd** to make sure you are in /var/spool/lpd/name-of-printer

Type **rm *** and enter

This will cancel all of the print jobs for that printer

COMMON UNIX COMMANDS
