

Printer Problems on Basic

For those of you who are having problems while trying to get Basic Programs to print, please do the following:

Check the following file to make sure that it exists

At a # sign type **/work/configs**

Check to see if **prtdevcs.cfg** exist?

If it does not, you will need to add it. Contact Software Support for assistance on adding this file. Please remember that the last line of the file that you add has to include a character set that is unique.
