

CD-ROM

Loading an update

To load an update, startup, or dbdemo on the laptop, follow the directions below:

With the CD properly inserted into the CD Rom

1. From the prompt type **# mount /dev/cd0 /mnt** [now hit the **enter** key]
2. From the prompt type **# cd /mnt**
3. Now hit the **F-1** key to find the name of the file you want to extract. (example 980931~1.Z dbmo1 ????)
4. From the prompt type **# Copy the file to /work (example #cp 980931xx /work)**
5. From the prompt type **# cd /work**
6. From the work directory now uncompress the file [file name]
7. From the prompt type **# tar xvf** [file name]
8. From the prompt type **# cd /** (that is cd with a space, then a forward slash)
9. From the prompt type **# umount /dev/cd0**

Follow the same procedures to load other files

To copy a file on to a CD, choose the file and or directory name, then

1. From the prompt type **# tar cvf** [name you want file to be] /work or file name [name of file to copy]
2. Compress the file into a .Z format by typing **compress [myfile]**
3. Connect to the unix box by typing **ftp 200.10.10.100**
4. Type **bin**
5. Type **get [file name]**
