

LED Code summary

The following table summarizes LED flash codes for Seagate DAT drives.

<i>LED color</i>	<i>Action</i>	<i>Meaning</i>
Yellow	ON (lit)	The drive is reading or writing normally.
Yellow	Flashing Rapidly	A hardware fault occurred.
Green	ON (lit)	A cartridge has been inserted and is operating normally.
Green	Flashing Slowly	A cartridge has been inserted but is generating excessive errors beyond a predefined error threshold (warning only). Use a DDS cleaning cartridge to clean the heads.
Green	Flashing Rapidly	The drive could not write the tape correctly (a write error has occurred). Try using a DDS DAT cleaning cartridge to clean the heads or try a new cartridge.
Green and Yellow	Both flashing slowly	A prerecorded audio cartridge has been inserted and is being played automatically.
Green power LED (external drives)	ON (lit)	The external drive is powered on.
