

Making An Adwin Floppy

The following document will explain how to make an Adwin floppy .This must be done from a dos prompt on david anders machine.All of the following commands must be typed from the command line.The commands to be issued are in **bold**.

To open up a dos prompt follow these instructions:click on **START>PROGRAMS>MSDOSPROMPT**.

From here switch to the "d" drive:

```
C:>d: (enter)
```

From here switch to the utility directory:

```
D:>cd \utility (enter)
```

From here type in the following commands to initiate the creation of the floppy:

```
D:>\utility\rwfloppy -w adwin1-1.img (enter)
```

This will create an Adwin floppy.
