

Removing Message Manager

1. From the # type

```
mmgr -l
```

This will tell you where the message manager directory is.

2. Remove this directory and everything under it by typing

```
rm -r /mmgr directory name
```

3. Change directories into /usr/bin by typing

```
cd /usr/bin
```

4. remove the ckmm, mmdetach, mmgr, and mmwatch files by typing

```
rm ckmm mmdetach mmgr mmwatch
```

5. Change directories into /etc/default by typing

```
cd /etc/default
```

6. Remove the mmgr.loc file by typing

```
rm mmgr.loc
```
