

Multi-Screen- MSC Fix.txt

when troubleshooting multiscreens you may run into these problems:

The screen may have only partial painting or you may not be able to log in to other screens. There may be other problems which resemble a hand-shaking problem.

If so, the customer may need this program fix sent to them.

TOM DOES NOT LIKE STEVE'S TAMPERING WITH OTHER PROGRAMS!
I DO NOT USE HIS CRAP.

{Step 1}

Change to the directory usr/steve/32v500.
cd /usr/steve/32v500

{Step 2}

Call into the customer's modem.
callr [call sign]

{Step 3}

(In their system), Change to the temp directory.
cd /tmp

{Step 4}

Enter the transfer mode.
transfer

{Step 5}

Transfer the file abcsprof.tar to their system.
(S) - to send data
Local filename: abcsprof.tar
Remote filename: Ctrl + R to repeat the last command
(H) - for `huge` file transfer (if preferred)

{Step 6}

Expand the file abcsprof.tar.
tar xvf abcsprof.tar

{Step 7}

Change to the abcsdist directory.
cd /abcsdist

{Step 8}

Run abcsinstall and answer questions as you normally would.
abcsinstall

If this fix does not work, then check the pseudo config file

```
tdevconf                :database
termdevs.cfg            :basic
```
