

# MLink Installation

**Note: Mlink is now Located in Swinstall, DO NOT USE THIS DOCUMENT, IF YOU HAVE SWINSTALL!**

This section may not be performed until the "1-abscfg Installation" or "Program Installation" sections are completed. (mlink.tar must be loaded first.)

Note: Starting with 'progtapel version 3.9e, mlink.tar has been copied from the "programs" directory to /usr/bin as well.

```
# cd /tmp
# tar xvf /usr/bin/mlink.tar
```

(A list of files being restored from the file "mlink.tar" will appear.)

```
# ./install
Type <CR> to continue          RETURN
default directory?            RETURN
(This question no longer asked: loc. of distrib. files: /work/programs)
link binaries?                RETURN
default dir, binaries         RETURN
enter your selection.         /dev/ttyaa
Type <CR> to continue          RETURN
# chmod +rw /usr/spool/uucp
# mlsetup
Type RETURN if ok            RETURN
```

Note: If you reinstall abscfg, you will need to redo lmlsetup.1 This will re-add the 11MLINK=11 line to root's /.profile.
