

## Moving Data into Place

When your transfer file has finished, from the prompt type:

**# If**

You are looking for a “userdata.tar.Z” file that you have just transferred.

On the remote machine you are now ready to type from the prompt:

**# uncompress userdata.tar.Z**

When the process is finished running type from the prompt:

**# If**

The file that you had just moved, should now have a file name “**userdata.tar**”

Now from the prompt type :

**# tar xvf userdata.tar**

The file should now uncompress and put everything in place.

To check to see if all of the files are properly uncompressed, From the prompt type:

**#If**
